

# **NOTICE**

## **JOB OPPORTUNITY**

**POSITION TITLE:** **CIVIL ENGINEER**

**NUMBER OF OPENINGS:** **ONE (1)**

### **DUTIES**

- Analyze blueprints, survey reports, maps, and other data related to project design.
- Evaluate regulations, site conditions, and other factors relevant to construction projects.
- Analyze the results of soil tests and building materials to determine the strength and stability of foundations and support structures.
- Prepare cost estimates for equipment, materials, and labor to assess a project's economic feasibility.
- Utilize design software to plan transportation systems, hydraulic systems, and structural components.
- Submit permit applications to local, state, and federal agencies, ensuring projects comply with relevant regulations.
- Perform or supervise surveying to establish building locations, site layouts, grades, and elevations to guide construction.
- Oversee construction activities, ensuring that projects are executed according to plans, specifications, and safety standards. This includes managing the construction, repair, maintenance, and replacement of buildings and infrastructure.
- Oversee construction projects, ensuring they adhere to timelines and budgets, and oversee the design and safety of temporary structures used during construction. This role may also involve overseeing project communications.

### **REQUIREMENTS:**

- Bachelor's degree in Civil Engineering (may be foreign equivalent)
- 60 months of experience as a Civil Engineer

**RATE PAY:** \$85,883.00 / Year
